R 2 800,00 per delegate (excluding 15% VAT)

Course Overview

This highly interactive and practical course is designed to provide delegates with a sound knowledge of key elements of environmental practices. The course enables delegates to understand the fundamental environmental ethics, concepts, and environmental value position. The delegate is required to develop a code of environmental ethics that is relevant to his or her field, and to analyse environmental policies, practices, and problems concerning environmental ethics.

Apply Fundamental Knowledge of Environmental Ethics to A Field of Work or Study

Who Should Attend?	- Individuals who are interested in environmental greening and conservation of endangered environmental attributes. - This course is also suitable for those who are keen to obtain methodologies to practice ethical behaviour towards the environment.
Course Objectives	The fundamental objective of the course is to equip delegates with the knowledge to develop a code of environmental ethics that is relevant to his or her field, and to analyse environmental policies, practices, and problems concerning environmental ethics.
Benefits	Benefits of this course include: - Expanded fundamental knowledge and understanding of environmental ethics. - Increased ability to analyse a range of environmental practices and problems and develop a synthesis that illustrates ethical dilemmas associated with environmental issues. - Obtaining an understanding of the environmental value positions reflected in a range of key environmental policies and related procedures. - Development of a code of environmental ethics guiding practice within your field of work or study.

Course Content

Course Modules	Course modules consist of: - Key concepts related to environmental ethics. - Different perspectives in environmental ethics and associated value positions. - Practical implications of the contested and ambivalent nature of environmental values. - Analysis of environmental and development practices with environmental ethics. - Environmental value positions are held by stakeholders associated with these environmental practices and problems. - Ethical dilemma scenarios. - Ethically responsible alternatives or solutions.
-----------------------	---

	8. Key international and South African environmental policies and legislation. 9. Demonstration of workplace-based knowledge of environmental policies and procedures. 10. Analysis of policies and procedures to identify environmental value positions.
Certification and Assessments	All delegates who complete the summative assessment will be assessed, moderated, and receive a SOR (Statement of Results). Thereafter a Certificate of Competence from WWiSE (or SETA for qualifications) will be issued.

About WWiSE

Who are we?

World Wide Industrial & Systems Engineers (WWiSE) is an ISO consultancy, training, business solutions, and systems implementation firm based in Southern Africa that provides clients with effective business processes management solutions in preparation for ISO compliance. The solutions we provide and implement allow our clients to compete favourably in modern competitive business environments, both locally and internationally. We also strive to be the leading training providers in SHERQ, ISO, Engineering, Finance, Business, and Project Management.

What do we do?

Our services are aimed at the improvement of quality, efficiency, knowledge, and competitiveness of client companies. This service range includes:

- ISO and SHERQ Systems implementation services, whereby we assist clients in meeting the requirements of (but not limited to) ISO 9001, 14001, 22000, 31000, 27001, 20000-1, 50001, and ISO 45001 Standards.
- Integrated Management Systems development whereby we integrate several business systems and management solutions into a single management system to comply with standards.
- Training of all employees (Shop Floor to Executive Management) in the fields of SHERQ, Engineering, Finance, Business, and Project Management to meet job responsibilities and expertise requirements of International Standards.
- ISO and Legal Auditing which includes Gap Analysis Audits, Product, Process, Procedural, and Systems auditing by our registered SAATCA Auditors.
- Customised web-based solutions integrating current systems to be in line with ISO requirements.

We are a Level 1 BBBEE Contributor that specialises in systems development, consultancy, training, and auditing.
