

MONITOR AND CONTROL THE EXECUTION OF THE PROJECT MANAGEMENT PLAN FOR A SIMPLE TO MODERATELY COMPLEX PROJECT AA

Unit Standard: 243812

Course Information

Qualification Title	National Certificate: Quality Management Systems
Course Name	Monitor and Control the Execution of The Project Management Plan for a Simple to Moderately Complex Project AA
Course Level	5
Course Credits	12
Course Duration	Three days
Cost of Course	R 2 800,00 per delegate (excluding 15% VAT)

Course Overview

The course allows delegates to understand the relevant skills that able them to monitor, evaluate, and report on the progress of a project and take corrective action where and when necessary.

This highly interactive and practical course is designed to provide delegates with a sound knowledge of all elements involved in Quality Management System practice or profession to:

- Monitor and control the performance of the project.
- Manage project baselines through integrated change control.
- Manage and resolve issues and new risks.
- Manage the development of the products of the project.

Quality Management System

Who Should Attend?	Intended for a person working as a Project Manager, or those seeking the necessary knowledge and understanding to monitor and control the execution of the project management plan for a simple to a moderately complex project.
Course Objectives	The fundamental objective of the course is to allow delegates to understand the correct procedures as well as identify and resolve issues and new risks on a project. This will ensure the development or result of the product meets the required specifications, time frames, and criteria.
Benefits	Benefits of this course include: - Improved knowledge relating to and understanding of project implementation. - Improved monitoring project management. - Effective feedback of project challenges and solutions.

Course Content

Course Modules	Course modules consist of: - Performance monitoring and measuring per project procedures. - Performance results evaluated against the project management plan per project procedures. - Preventative and/or corrective actions to ensure compliance with the project management plan. - Opportunities are identified and actions are developed to benefit from such opportunities in support of project objectives. - Developed actions are validated to ensure that they will achieve the desired outcomes. - Developed actions are implemented per project procedures. - Performance is reported to stakeholders in the required format and time frame. - Change needs are identified and recorded per project change control procedures. - The impact of the change needs is assessed and evaluated in terms of the relevant baselines.
-----------------------	---

	10. Recommendations to address the change needs are compiled in the required format and approval is obtained per project change control procedures. 11. Approved changes are implemented per project change control procedures. 12. Change information is communicated to relevant stakeholders per project change control procedures. 13. Issues are identified and addressed per project procedures to achieve project objectives. 14. New risks are identified and addressed per project procedures to achieve project objectives. 15. Issues and new risks that may have a change impact on the project are dealt with per project change control procedures. 16. Opportunity is provided to clarify product requirements with relevant stakeholders. 17. Product acceptance criteria are agreed upon and documented to an appropriate level of detail. 18. Proposed product solutions are agreed upon with relevant stakeholders, to an appropriate level of detail and in the required time frame.
Certification and Assessments	All delegates who complete the summative assessment will be assessed, moderated, and receive a SOR (Statement of Results). Thereafter a Certificate of Competence from WWiSE (or SETA for qualifications) will be issued.

About WWiSE

Who are we?

World Wide Industrial & Systems Engineers (WWiSE) is an ISO consultancy, training, business solutions, and systems implementation firm based in Southern Africa that provides clients with effective business processes management solutions in preparation for ISO compliance. The solutions we provide and implement allow our clients to compete favourably in modern competitive business environments, both locally and internationally. We also strive to be the leading training providers in SHERQ, ISO, Engineering, Finance, Business, and Project Management.

What do we do?

Our services are aimed at the improvement of quality, efficiency, knowledge, and competitiveness of client companies. This service range includes:

- ISO and SHERQ Systems implementation services, whereby we assist clients in meeting the requirements of (but not limited to) ISO 9001, 14001, 22000, 31000, 27001, 20000-1, 50001, and ISO 45001 Standards.
- Integrated Management Systems development whereby we integrate several business systems and management solutions into a single management system to comply with standards.
- Training of all employees (Shop Floor to Executive Management) in the fields of SHERQ, Engineering, Finance, Business, and Project Management to meet job responsibilities and expertise requirements of International Standards.
- ISO and Legal Auditing which includes Gap Analysis Audits, Product, Process, Procedural, and Systems auditing by our registered SAATCA Auditors.
- Customised web-based solutions integrating current systems to be in line with ISO requirements.

We are a Level 1 BBBEE Contributor that specialises in systems development, consultancy, training, and auditing.
