

ISO 3834-1:2021

Quality Requirements for Welding of Metallic Materials

GM Boilers supply industries with **cutting edge steam production technologies** and strategies as well as 24/7 backup and support!

ISSUES BEFORE CERTIFICATION

Clients requiring a Quality Standard to benchmark against when it comes to final products related to welding.

Risk associated with various welding work orders that are complex angles not documented.

The inability to define the Competency Matrix of skilled labourers that require relevant training and qualifications to grade as welders.

Governance – Policies, procedures, and work instructions on different welding requirements not created or implemented effectively.

Consistent Client Complaints and Returns on Welding Products.

Incorrect Calibration and maintenance of measuring instruments.

THE BENEFITS AFTER CERTIFICATION

Welding work instructions adopted to best practice national standards.

Assurance of Clients when it came to technical welds.

Training programs created with staff undergoing training and achieving welding qualifications and gradings.

The Management system assisting in correct processes to create maintenance plans, calibration programs for monitoring and measuring equipment.

RESULTS:

45%

increase in revenue over new clients.

38%

increase in winning of tenders, closing ratios.

86%

reduction in returns of welds and complaints.
