# WWISE COMPANY OVERVIEW

“When it comes to quality, is perception reality?”

World Wide Industrial & Systems Engineers' (WWISE) core function of business is ensuring companies around the world follow the ISO Standards and Principles. WWISE specialises in ISO systems Implementation, Consulting, Training & Auditing and has been in business for 11 years and counting.

## Our Achievements

## ABOUT ISO

ISO was founded with the idea of answering a fundamental question:

“What is the best way of doing this?”

### What is ISO?

ISO is an independent international organisation with a membership of 165 national Standards bodies that consist of experts sharing knowledge to develop International Standards that Support innovation and solutions to global challenges.

There are currently 23 452 ISO Standards and each Standard can be considered as a formula for describing the best way of doing something, be it making products, managing processes, delivering services or supplying materials.

### Benefits of being ISO certified?

Improved Business | Improved Regulation  
Improved Products & Services

- Reducing Costs
- Increasing Efficiency
- Mitigating Risks
- Creating Consistency
- Improving Customer Confidence
- Increasing Uniformity
- Increasing Competitiveness

## POPULAR ISO STANDARDS IN A NUTSHELL

| Quality Management                                                                                                                     | Environmental Management                                                                                | Occupational Health & Safety                                                                                                                                         | Information Security Management                                                                                                        |
|----------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| Demonstrate the ability to consistently provide products and services focusing on achieving high customer satisfaction and efficiency. | Improve your organisation's environmental impact by reducing industrial waste and environmental damage. | Enable your organisation to provide safe and healthy workplaces by preventing work-related injury and ill health, and by proactively improving its OH&S performance. | Protect your organisation's information in a cost-effective way through the provision of security for any kind of digital information. |
| ISO 9001                                                                                                                               | ISO 14001                                                                                               | ISO 45001                                                                                                                                                            | ISO 27001                                                                                                                              |

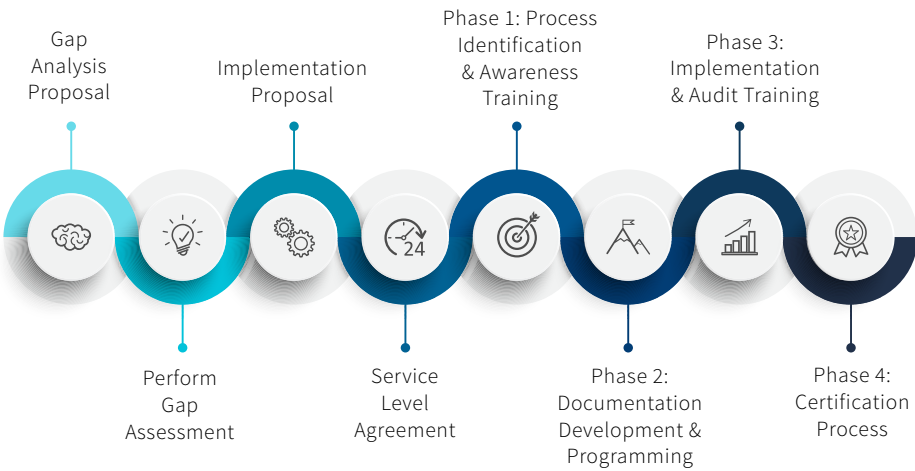

| Business Continuity Management                                                                                                                              | Energy Management                                                                                                                                                            | Risk Management                                                                                                                                  | Food Safety Management                                                                                                                                              |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Safeguard your organisation from a wide range of potential threats and disruptions ensuring the continuation of operations without major impacts or losses. | Enable your organisation to follow a systematic approach in achieving continual improvement of energy performance, including energy efficiency, energy use, and consumption. | Allow your organisation to thrive in an environment of constant uncertainty by applying principles and guidelines for effective risk management. | Inspire confidence in your organisation's food products by demonstrating the ability to control food safety hazards therefore ensuring the production of safe food. |
| ISO 22301                                                                                                                                                   | ISO 50001                                                                                                                                                                    | ISO 31000                                                                                                                                        | ISO 22000                                                                                                                                                           |

| Ensuring effective training on ISO awareness and how to utilise your ISO management system. | Ensuring the effective maintenance of your ISO management system. | The ongoing improvement of products, services or processes within your organisation using our continual improvement tools. | Legal Compliance Evaluation highlights any deviations, areas of non-compliance, and risks in an organisation. | Development and customisation of Sharepoint to be utilised as a document repository and internal communication and collaboration tool. | Determining your organisations compliance or conformance to other governance frameworks. |

### Gap Analysis

R 9 250-00 per man-day  
A gap analysis will determine your organisations overall conformance to the standard.  
For companies that have more than 30 employees a Gap Analysis Audit is mandatory.

|                                | Applicable to Common Standards |                             | Applicable to Intricate Standards (ISO 27001, ISO 50001, ISO 20000-1 and any other standard) |                              |
